EDUCATION

Karpagam Institute of Technology — B.Tech in Information Technology

Nov 2022 – May 2026

PROFESSIONAL EXPERIENCE

VSeek Ventures — Backend Developer Intern | Hybrid

July 2025 – May 2026

- Built REST APIs using Go, Echo, and PostgreSQL with JWT authentication and RBAC for healthcare and project management workflows; designed schemas, migrations, triggers, and modules for billing, attendance, vendors, and approvals.
- Gained hands-on data center experience in server operations, OS-level tasks, networking, production deployments, and infrastructure reliability; collaborated with cross-functional teams to deliver scalable, production-ready backend services.
- Participated in code reviews and maintained API documentation using Swagger and Postman, ensuring consistent standards and quality across all backend modules.

PROJECTS

Mental Health Bridge - AI-Driven Psychological Risk Detection & Student Intervention Platform

Feb 2026

- Built an AI-powered digital mental health platform with PHQ-9/GAD-7 screening, risk classification (low/moderate/high), and an empathetic chatbot that delivers coping strategies and escalates high-risk cases to professional counselors.
- Developed an anonymized admin analytics dashboard for institutional trend monitoring, plus confidential counselor booking, peer support forums, and a psychoeducational resource hub. Tech: Python, NLP, ML, PostgreSQL, REST APIs.
- Implemented mood tracking and longitudinal wellness monitoring, enabling students to visualize emotional patterns over time and take proactive steps toward mental health management.
- Ensured end-to-end data privacy through anonymized data handling, ethical AI design principles, and role-based access control separating student, counselor, and admin interfaces.

VisionChallan AI - Intelligent Traffic Violation Detection and Challan Management System

June 2026

- Built an AI-powered real-time traffic monitoring platform using YOLOv8 and deep learning to detect helmet non-compliance, seatbelt violations, and unsafe driving behavior from vehicle images with high accuracy; integrated EasyOCR for automatic number plate recognition to extract and store vehicle registration data in PostgreSQL.
- Designed and deployed a FastAPI-based async REST API backend for image processing, AI inference, challan generation, and vehicle-based search; containerized the application using Docker for consistent, production-ready deployments.
- Built a citizen portal for challan search, fine calculation, and payment integration; Tech: Python, FastAPI, YOLOv8, OpenCV, EasyOCR, PostgreSQL, MongoDB, Docker, REST APIs.

Smart Healthcare Assistant – AWS Powered AI Healthcare System

Nov 2025

- Developed an AI healthcare assistant on AWS to process medical PDFs, deliver NLP-driven summarization and specialist recommendations, and provide real-time voice chat (STT/TTS via Amazon Polly) with a local medical knowledge base.
- Architected a serverless event-driven pipeline using AWS Lambda and API Gateway to handle concurrent patient queries with auto-scaling, ensuring high availability and sub-second response times.
- Tech: AWS Comprehend Medical, Bedrock, Personalize, Lambda, API Gateway, DynamoDB, S3, Amplify, CloudWatch.

TECHNICAL SKILLS

- Programming: Python, Go, Java
- Databases & Tools: PostgreSQL, MongoDB, Git, GitHub, FastAPI, REST APIs, Postman, Swagger
- Cloud & DevOps: AWS (S3, Lambda, CloudWatch), GCP, Terraform, Grafana, Linux, Docker
- AI/ML: YOLOv8, OpenCV, NLP, Computer Vision, Model Training & Inference

ACHIEVEMENTS

- Invited as Resource Person by Coimbatore Institute of Technology (CIT) to conduct a hands-on 'Vibe Coding' workshop for 150+ students (Sep 13, 2025); received excellent feedback from participants and faculty.
- Presented research paper 'Tech Career Navigator' at IASICT'24 international conference on AI and Computing Tech.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect – Associate
- Salesforce Certified Agentforce Specialist
- Oracle Certified Foundations Associate
- GitHub Foundations
- NPTEL: Cloud Computing, Introduction to IoT
